

Virtual Painting by the Masters

Virtual Painting by the Masters

Virtual Painting by the Masters Allows Remote and Distributed Teams to Create One Giant Mural Together

Each remote or distributed worker receives a custom – one of a kind – paint-by-numbers canvas to complete. **Each canvas is part of a large team mural!**

A complete painting kit is shipped to each remote worker including

- Brushes
- Paints
- Easel
- Instructions
- AND custom canvas to paint!

Your team can paint in real-time enjoying the informal conversation and banter painting and hanging out naturally provides. Or you can choose to complete your paintings asynchronously and reconvene for a spectacular ending. Choose from our set of in stock images, or create your own custom image!

Spectacular Interactive Conclusion

Each of your painting experts will take a photo of their completed work and upload it to a common interactive picture board. Once everyone has uploaded their images, the team can figure out how they all go together by moving their pieces around to complete the mural.

A fun interactive activity ensues as each person can move their own picture, while the whole team can talk over video conference. The goal is to arrange the unique canvases to align and make one coherent and beautiful image!
