

## Robot Racing Corporate Team Building!

*Team building for everyone who likes to have fun in teams!*

[Robot Racing](#) is the perfect way to get folks talking, laughing, engaging, and enjoying the energy.

Teams will build their own **custom Robot Racer** and **compete in full-contact robot racing!**

### Build a Custom Robot as a Team!

Teams will:

- Build the Basic *Robot Racer* model together, and learn the skills and techniques needed.
- Use 50 extra parts to design and build their own **custom Robot Racer**.
- Trade with each other and with us for additional parts.
- Test and improve their *Robot Racer* before racing, and between races.
- Determine Pole Position at the "Official Weigh-In".

### Race Robots in Full-Contact Robot Racing!

- **Oval Track:** The first round of racing uses the weight of each robot to determine the starting order. Teams complete 1 lap per team member, changing drivers after each lap.
- **Figure Eight:** For the final race, we transform the oval into a figure-eight course with crossing tracks! 2-laps of chaos with a champion at the end!
- Everyone loves seeing their *robot racer* traverse the course, and some folks win the race!

### Easy to Deliver Anywhere

- **About 1.5 to 2 hours.**
- Great for groups of 600 to 10 people
- Flexible teams of 5 to 10 people are ok!
- Available onsite at your location in any meeting room setting.
- Races can be inside or outside.
- Safe and accessible to all departments – teamwork is the difference!
