Build and Battle Robots with local STEM Students!

[Robot Build and Battle 1](#) corporate team building with local STEM students participating!

Your employees will be role models for aspiring STEM students from local neighborhoods. We look for STEM programs or Robot Clubs where students are truly inspired by science, math, and technology, and we invite them to join your teams and compete alongside your employees.

[Blog: STEM Charity Event at VMware](#)

- Students attend your meeting and work with your teams of employees to build the battle robot faster than the other teams.
- After building, everyone gets a chance to battle each other in robot combat!
- Companies donate to the local STEM club or school organization to help them purchase much needed robot parts, supplies, and tools.
- In return, the students travel to your meeting and participate in the event with you.
- The event is ideal at about 2 hours

Successful teams use communication, teamwork and leadership to outperform the other teams.

Your teams can compete for the **World Record Robot Build Time** kept on our [blog](#) and, more importantly, they can compete to beat each other!

Multiple rounds of robot combat!

- *Points Based All-Bot Melee!* – All bots in the arena at the same time!
- “Last Bot Standing” Finale!
