

TEAMWORX TEAM BUILDING

DRONE GAMES

CUSTOM BUILD & COMPETITION FLYING

Each team designs and builds their own custom drone — then takes it straight into a three-event competition against the other teams in the room.

TWO FORMATS

SMALL GROUPS

UP TO 100 PEOPLE • TEAMS OF 5 • ONE DRONE PER TEAM

Each team builds a single custom drone and takes it through all three events:

- Modify and repair the drone throughout the competition
- Everyone gets a chance to fly, with the support of their team

LARGE GROUPS

100+ PEOPLE • TEAMS OF 10 • TWO DRONES PER TEAM

A second kit opens up strategy. Each team decides how to spend it:

- Custom design each drone for a specific challenge
- Custom design each drone and see which performs better
- Create an identical back-up for consistency and support

THREE EVENTS

ALL FLY

FASTEST TEAM WINS

Every person on the team flies the course marker and back. No sitting this one out; the clock runs until the last pilot lands!

ALL TRY

LAND ALL FIVE PADS

Five landing areas, each a different size, so each one is a different degree of hard. Everyone flies once before anyone flies twice.

BEST FLY

MOST POINTS IN 3 MINUTES

Cargo is colored paperclips staged across the landing areas; your kit's four magnets are how you lift them. Color sets the value, and **red costs you points**. One rule: swap pilots after every drop-off.

EVERY DRONE FINDS A HOME

100+ people: every drone is donated to a classroom for STEM instruction, where students use them to take a complete course on flight and engineering.

Up to 100 people: the winning team keeps their drone.
